

Australian Rainfall and Runoff

4th Edition

Draft Chapters (as at June 2007)

<i>BOOK I - SCOPE AND PHILOSOPHY</i>	1	INTRODUCTION
	2	RANGE OF APPLICATIONS
	3	RISK BASED DESIGN
<i>BOOK II - APPROACHES TO FLOW ESTIMATION</i>	1	INTRODUCTION
	2	HYDROLOGIC DATA
	3	RANGE OF TECHNIQUES
	4	SELECTION OF AN APPROACH
<i>BOOK III RAINFALL ESTIMATION</i>	1	INTRODUCTION
	2	SYNTHETIC RAINFALL BURSTS
	3	SYNTHETIC STORMS
	4	CONTINUOUS RAINFALL SEQUENCES
<i>BOOK IV - PEAK FLOW ESTIMATION</i>	1	INTRODUCTION
	2	AT-SITE FLOOD FREQUENCY ANALYSIS
	3	REGIONAL METHODS
<i>BOOK V - HYDROGRAPH ESTIMATION</i>	1	INTRODUCTION
	2	EVENT BASED MODELS
	3	CONTINUOUS RUNOFF ESTIMATION
	4	HYDROLOGIC MODELS
<i>BOOK VI - FLOW HYDRAULICS</i>	1	INTRODUCTION
	2	BASIC ASPECTS OF OPEN CHANNEL HYDRAULICS
	3	HYDRAULIC STRUCTURES
	4	UNSTEADY FLOW AND NUMERICAL MODELS
	5	ISSUES IN APPLICATION OF HYDRAULIC MODELS
<i>BOOK VII – APPLICATION OF CATCHMENT MODELLING SYSTEMS</i>	1	INTRODUCTION
	2	CATCHMENT MODELLING PRINCIPLES
	3	PARAMETER ESTIMATION TECHNIQUES
	4	UNCERTAINTY DETERMINATION
<i>BOOK VIII – LARGE TO EXTREME FLOOD ESTIMATION</i>		
<i>BOOK IX – RUNOFF IN URBAN AREAS</i>	1	INTRODUCTION
	2	ASPECTS OF URBAN HYDROLOGY
	3	URBAN DRAINAGE CONCEPTS
	4	ESTIMATION OF STORM FLOWS
	5	DRAINAGE SYSTEM HYDRAULICS
	6	RUNOFF DETENTION AND RETENTION
	7	SAFETY DESIGN CRITERIA
	8	URBAN DRAINAGE MODELLING
	?	RATIONAL METHOD
